

The aim is to demonstrate Finnish approaches and know-how in the CBRN field, especially in:

- monitoring and detection
- CBRN reconnaissance
- laboratory operations
- protection
- decontamination
- medical treatment
- logistics
- cooperation with different authorities.

Decision makers all over the world can face the new challenges and situations better if they understand the whole process in the CBRN field. In the outdoor exhibition you can see some of these modern equipment and systems.

- Finnish companies in the CBRNE field have access to a very good network (CBRN-Finland Team). As excellent professionals the CBRN-Finland Team can develop and produce and offer cost-effective systems for your needs all over the world.
- The variety of customers has extended from the traditional military customers to civilian customers.
- Through the network the Team has also possibility to give education and training in CBRN field with the new Finnish Crisis Management Centre (CMC).
