

Dräger mobile CBRN detection solutions

Eric Rüder and Günter Seemann

Dräger
Department of project solutions
Revalstrasse 1, 23560 Luebeck, Germany

International crisis management requires the continuous adaptation of materials and equipment to the task in hand. The CBRN detection solution from Dräger is based/depends on the customer's individual scenario and strategy. Upon the customer's request Dräger is to be understood as system consultant and system integrator: Dräger supports the customer from the early stage of process analysis, design, layout and workflow to the point of final (solution) implementation, (education and) training and life cycle management to fulfil the demands of current hazard management world-wide.

As a specialist in the area of total solutions and hazard management, Dräger has reliably partnered the NATO armed forces as well as civil defence and fire brigades for many decades.

Dräger is your solution provider for:

- Vehicle concept
- Colpro concept
- Detection concept CBRN
- Analytic concept CBRN
- Decontamination concept
- Education / Training concept
- Life cycle concept
